

OIL, GAS & RENEWABLE TECHNOLOGY REVIEW

PLATFORM is a leading, high quality, monthly magazine with editorial, features and advertising meaningful to professionals in the oil and gas and renewables industries.

As well as news, views and technological developments, attention is also focused on new products and services, innovations, legislation, contract awards and on the people who form the backbone of the industry.

- Excellent exposure to oil and gas industry decision makers.
- High quality colourful publication – gets noticed.
- Circulation – 5000. Please note that each magazine may be read by ten or more people – sometimes many more than that with magazines at company reception / breakout areas / on platforms etc. Thus readership could be far in excess of printed copies.

A worldwide audience can view PLATFORM at www.platform-oilandgas.com and the magazine is delivered monthly in Aberdeen, Aberdeenshire, Tayside and Great Yarmouth together with subscription copies throughout the UK and overseas. Circulation is increased for special issues (eg. Offshore Europe) and the magazine is read throughout the industry at all levels, achieving multiple readership within companies and at offshore locations.

For information about editorial, press releases, special features or advertising, please contact us – we do our best to be helpful.
